PROTECT

Emollin[®]

Spray • Soothe • Protect

It is particularly useful for areas like the back, and also for children. Plus it has, in my opinion, the huge added benefit of containing no preservatives or additives.

- Dr Taghipour,
Consultant Dermatologist

Locks in moisture

Emollin's occlusive formula helps your patient's skin to retain moisture, ideal for extremely dry skin conditions such as, but not limited to, eczema, psoriasis and ichthyosis, depending on clinical judgement.

Protective barrier

Emollin provides a barrier to protect vulnerable skin from external irritants. Ideal for use before exercising or swimming.

Gentle formulation

Emollin contains a 50:50 mix of pure white soft paraffin BP, and liquid paraffin BP, dissolved within silicone which quickly evaporates on application, leaving only pure emollient on the skin. Ideal for those with sensitive skin, including water contact allergy.

Spray on relief

Emollin's easy spray-on application allows children and adults alike to maintain a consistent emollient application routine, even when skin is sore to touch. The spray-on application also reduces product waste, with **3x** the coverage of hand applied ointments.¹

¹Independent laboratory report, CD Medical, Data on file

Formulated to be gentle on the most sensitive of skin

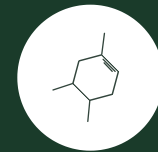

Preservative free

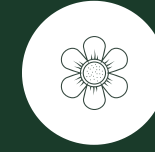

SLS free

Lanolin free

Paraben free

Fragrance free

Water free

SPRAY ON SKIN RELIEF

No direct hand contact required, reducing risk of cross infection and folliculitis.

No need to rub or touch sore, or fragile skin, encouraging patient adherence.

Emollin covers 3x the area of ointments or creams applied by hand.¹

Easy access to hard to reach places, such as the back, and lower limbs.

Empties completely with minimal wastage

Application Guidance

1

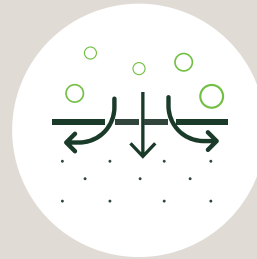

Protect hard floors with a towel to prevent from becoming slippery

2

Spray from 15cm from the skin, in a continuous motion

3

No need to rub in, simply allow to settle onto the skin

4

Spray at any angle, even upside down, ideal for hard-to-reach places

5

Apply as often as required, ideal for post bathing and night time moisturisation

Emollients when dried onto clothing or bedding can catch fire easily. Do not smoke or go near naked flames.

From a patient's point of view

“In my opinion, it is a revolutionary product in her eczema tool kit. It has reduced infection, improved her ability to apply her own treatment, allows quick and easy application when out in public and in school.”

-Kate, UK

“Thank you for creating a product that has saved my boys skin. He hated creams because he feared the pain, the spray was a game changer.”

- @allergies_awareness_mum

“Emollin has been a game changer for our son and his ichthyosis and especially during the pandemic. Using Emollin spray instead of an applied cream meant we could continue to use support workers both at home and in school with minimal risk to them both.”

-Elizabeth, UK

“Emollin is fab! So easy to use as you don't have to touch yourself... it sprays from all directions and doesn't sting at all”

- Lichen Sclerosus Support Group Member

“I will continue to shout out about how amazing Emollin is. it has changed Jacksons life and was one of the key components in getting him home after 21 months in hospital. THANK YOU. We now use Emollin every single nappy change and after his baths and we have had no problems. Without it, we would be back in hospital.”

- Debbie, UK
