

Our VEGA patient chair offers comfort and flexibility in one. The electrically adjustable backrest allows for stepless adjustment to a comfortable horizontal position, transforming it into a comfortable cosmetic treatment chair in no time at all.

The leg rests can be adjusted 90° outwards, enabling a particularly comfortable and safe access. More freedom of movement ensures comfortable seating – even with limited mobility.

The two-part leg rest with separate heel support ensures optimal support and individual comfort. Thanks to the mechanical extension, the heel support can be adjusted quickly and precisely.

The gas spring-assisted leg rests can be adjusted effortlessly and continuously – for comfortable adjustment and easy handling.

VEGA & VIREO

A STRONG TEAM IN EVERYDAY PRACTICE

Whether for a pedicure practice or a beauty salon, with the VEGA patient chair and the VIREO work chair, you are choosing a perfectly coordinated duo that ideally combines comfort, functionality, and design. And all this at an excellent price-performance ratio.

VEGA – DESIGNED FOR YOUR CHALLENGING EVERYDAY PRACTICE

The **VEGA patient chair** was specially developed for treatments where ergonomics, precision, and flexibility are key. Two motors enable comfortable adjustment of the seat height and angle, as well as the backrest – conveniently and hygienically controlled by a foot switch. High-quality, easy-care plastic cladding (ABS) ensures stability and an elegant design, while the ergonomic upholstery offers maximum comfort even during longer treatments.

Thanks to its rotating seat, flexibly adjustable leg and heel supports, and electric adjustment of the seat position (Trendelenburg) and backrest to a fully horizontal position (cosmetic treatment chair), the chair adapts perfectly to any treatment situation.

VIREO – COMPACT DESIGN, MAXIMUM RELIEF

VIREO is the ideal work chair for precise work with maximum relief. The ergonomically shaped seat supports a healthy position and offers notable comfort even during longer treatments. Thanks to its compact, stable design, it is particularly space-saving and secure. Individually adjustable seat and backrest tilt, flexible seat height adjustment and 360° rotating, self-braking castors make the VIREO a mobile and reliable companion in everyday practice.
